Entrematic Smart Connect

The perfect solution to control any automation in a smart way

EN

Entrematic Smart Connect

Entrematic Smart Connect is the new system to manage entrances via App or PC, remotely or locally.

The hub, mounted close to the garage or gate operator, is the core of the system. Thanks to the Wi-Fi 2.4 GHz it can be connected to a WLAN, alternatively to a LAN using a USB/Ethernet adapter and it can control up to 3 operators. Wireless sensors send the status of the access: open, close, left open, obstruction. By integrating the indoor-outdoor Wi-Fi-Ethernet Camera, it is possible to view HD real time video while managing the access. **The system is not only perfect for new installation but also ideal for retrofit market.**

FREE Entrematic Apps available on Play Store and App Store

Entrematic Smart Connect App:

- each hub controls up to 3 garage doors or gates
- real time video per door (2 fps)
- the app can manage many hubs at the same time
- door status, temperature and sensor battery
- log of events accessible in home screen
- pictures of garage/gate customizable

Entrematic CAM App:

- video monitoring (25 fps 50 Hz - 30 fps 60 Hz)
- push notifications
- video recording and snapshot

UNIVERSAL
for all gate manufacturers, for more operating systems

Not only for Ditec Entrematic automation!

Compatible with all competitor product range.

Wiring diagrams available on <https://entrematic-smartconnect.com>

Compatible with **iOS and Android** devices.

It works with all the browsers.

Connected to your smart home

Entrematic Smart Connect integrates with most popular Smart Home platforms. Control your access like never before, with geofencing, voice commands and through scene creation.

MAKE YOUR HOME SMART with Apple HomeKit

Entrematic Smart Connect is part of a home automation system. Thanks to the App "Home" on your Apple device, you can make your home smart, creating scenario involving the different systems (lighting, temperature control, sound distribution, etc.).

Apple HomeKit technology provides an easy, secure way to control your home from your iPhone, iPad, or Apple Watch

INTEGRATION WITH Home Assistant

VOICE CONTROL

Manage the automation with a simple spoken command

"Ok Google, is the garage still open?"

"Hey Siri, close the gate."

"Alexa, close garage door."

GEOFENCING

Thanks to compatibility with IFTTT, it is possible to create personal applets: for example, manage the automatic proximity opening by configuring the GPS area

EASY to install

EXCLUSIVE features

Configure the system in four steps:

- 1 - install the Apps on the smartphone iOS / Android
- 2 - plug the Hub into the main
- 3 - follow the instructions on the display and automatically pair the device to the home network
- 4 - stick the wireless sensors to the gate or doors

Perfect for retrofit market!

Dedicated website and step-by-step guide on <https://entrematic-smartconnect.com>
