1. Mount the Closing brake kit with the two screws.
2. Unplug the drive unit micro switch and connect the closing brake kit to the control unit.
3. Connect the drive unit micro switch to the closing brake kit.

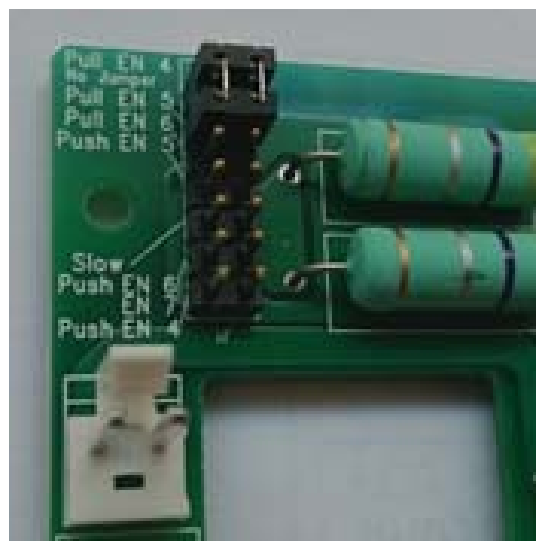

4. Adjust the closing time, at power off, to 4-6 seconds according to DIN 18263-4, by moving jumper.

Please note orientation of jumper, see picture below.

For inverse installation adjust Opening Time at power off.
